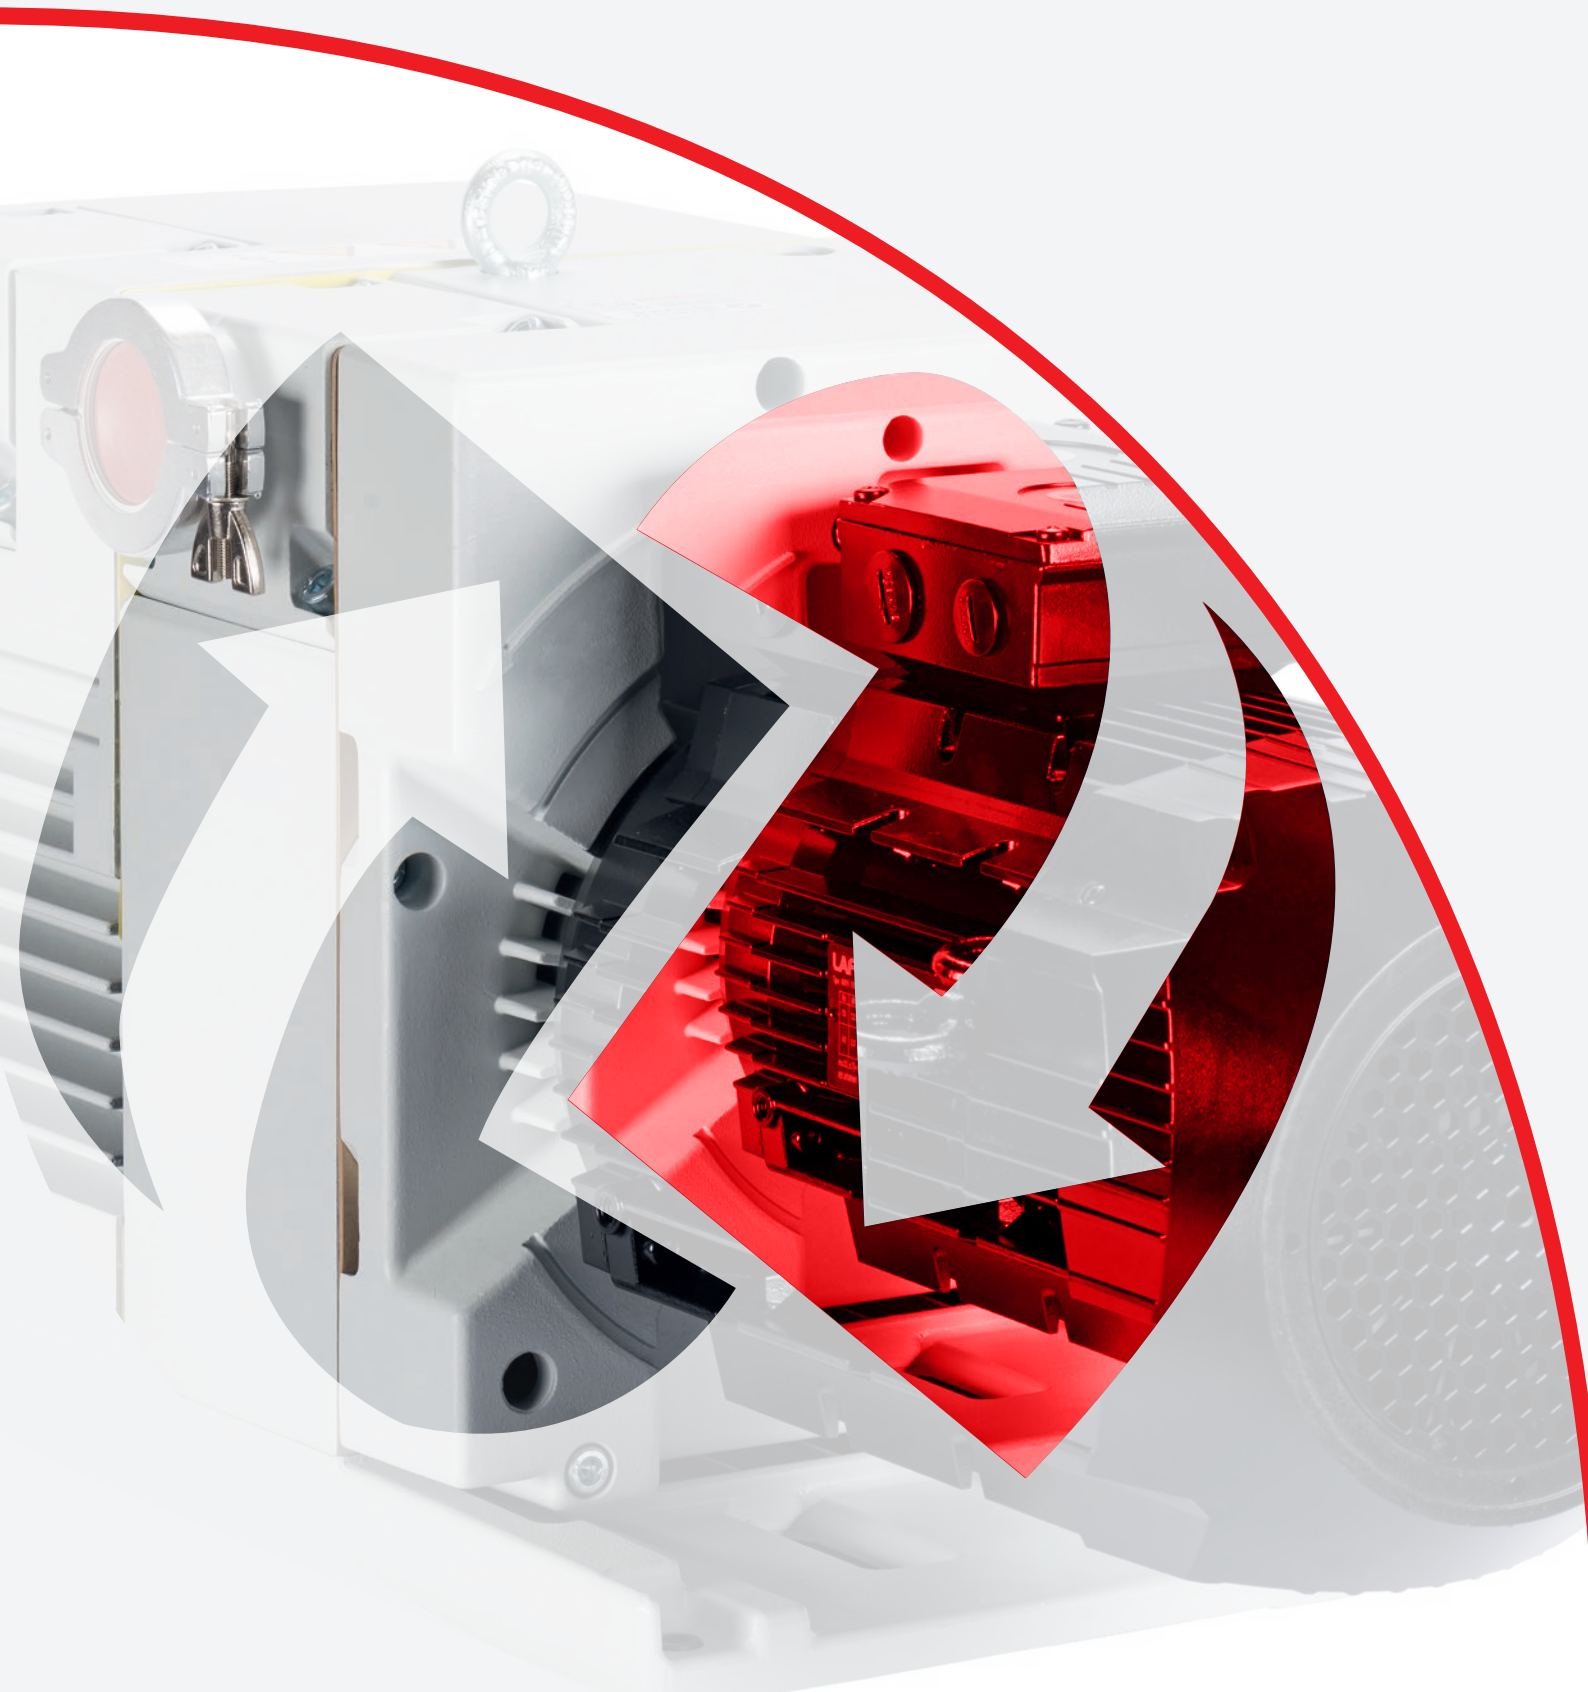
DROP THE EXCESS LOAD AND INVEST IN YOUR FUTURE!

Leybold



The Leybold BuyBack Program

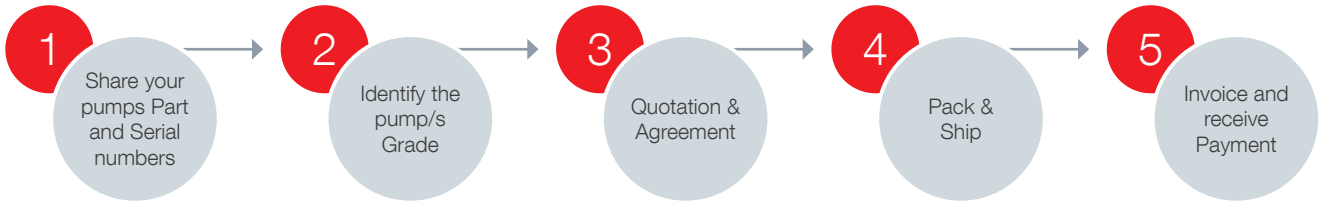
- Do you have excess vacuum equipment?
- Did you upgrade your vacuum equipment recently and wondering what to do with old ones?
- We can help you with your unutilized vacuum equipment that is taking up valuable space in your storage.

That's where our Buy-Back program can help!

At Leybold we're offering to take back your vacuum equipment through our Buy-Back Program.
With Buy-Back, we will take back your Leybold equipment and offer you cash in return that you can use to invest in your business.

How does it work?

It's just 5 easy steps



Pump Classification:

★★★ Un-used equipment (Brand New or refurbished products in original packaging)

★★☆ Working but needs service, no major components damage. (Motors, rotors, stators).

★☆☆ A non-working pump that needs service with major parts replacement.

The Buy-Back value depends on pump condition and classification, whether it is triple, double- or single-star classification.
